

Cin7 is an online inventory management system that packed with features, which helps you manage your business effectively while serving you time for the work that actually matters.

The API Integration allows you to connect to the NPFFulfilment Logistics Platform -

- Cin7 push orders to NPFFulfilment
- Cin7 pull order status from NPFFulfilment
- Cin7 pull the SOH (Stock on Hand) quantity from NPFFulfilment

Testing Criteria: Test Orders to be created using the following test item to test the full integration. These are test items we will not physically dispatch them during the testing process.

NPF001 / NPF004 / NPF005

Order Status and tracking: Cin7 can get the status of the order at any time. If the order is shipped, can get the tracking number and carrier name as well from NPFFulfilment.

Stock Updates: Cin7 can pull the stock levels from NPFFulfilment.

There are two options

- SOH Quantity – This is the actual physical stock at the warehouse.
- Available SOH Quantity – This is the quantity that is retrieved after deducting the orders from the SOH/ Ready for Process stage/ Back orders if any.
