

Saasu is a cloud-based accounting solution for small and midsize businesses. It allows staff and contractors to manage payments, books, invoicing, billing and financial accounting.

The API Integration allows you to connect to the NPF portal -

- NPF pulls invoice(s)/saleorder(s) from Saasu
- NPF pushes tracking numbers to Saasu
- NPF updates available stock on hand to Saasu

Requirements from Client in order to Integrate with NPF.

1. User ID
2. User Password

Order Filters that can be applied are as below:

Order Start Date: - This is the date that the client would like to start sending the Live orders for shipment. This will start from 12AM on a particular date. We cannot apply a particular time to pull the orders; hence it is just the date that is captured.

Prefix of the order: - We can apply a prefix to the order numbers coming in from Saasu. For instance, if the order number from Saasu is 1001 then we can add a prefix like SAS. On the NPF portal this order will be SAS1001. Sometimes a client can have multiple stores on Saasu, at this time the prefix helps to differentiate the orders from each site. For instance, if site 1 has order 1001 and site 2 also has order 1001 then prefix applied can be

Site 1 – SAS

Site 2 – SAS2

Hence the orders in the NPF portal will appear as

Site 1 – SPY1001

Site 2 – SPY21001

Order Status: - Statuses an order can go through are

Paid ---- Get only paid invoices/orders from the shopping cart.

Unpaid ---- Get the unpaid orders, for which shipments are not created.

All ---- Get all the orders from the shopping cart.

Country Filters: - using this feature we can always update the countries from which the client wishes to receive the orders.

Stock Updates – NPF can push the stock levels to the client Saasu cart. There are two options

- SOH Quantity – This is the actual physical stock at the warehouse.
- Available SOH Quantity – This is the Quantity that is got after deducting the orders from the SOH/ Ready for Process stage/ Back orders if any

This happens once the orders are processed and Shipped on our end.

Testing Criteria: Test Orders to be created using the following test items to test the full integration.

These are test items, we will not physically dispatch them during the testing process.

Item Code	Description
NPF001	This is Test Item 1
NPF004	This is Test Item 2
NPF005	This is Test Item 3

NPF will pull invoice(s)/order(s) in their specified order status.

NPF will update the tracking numbers in the notes field.

NPF will update as “NPFUpdated” in tag field, once tracking updated for an invoice(s)/order(s).

The above Pull and push will take place at frequent intervals.

Saasu API Integration

1) Create a new user.

To create a new user.

Go to Setting -> Invite User.

Create a user with your email and accept the invitation.

Create a password for the user.

- By confirming invitation link, it will allow you to create password for the user.

The screenshot shows a web browser window with the address bar displaying "Saasu Pty Ltd [AU] | https://secure.saasu.com/a/net/acceptinvitation_register.aspx?verify=ad0c4f5-f926-456b-9be5-a5a132458a5a&email=sankaranarayanan%40templecitytech...". The main content area is a form titled "Accept Invitation" with the Saasu logo. The form contains the following fields and text:

- Text: "As a new user of Saasu, we need you to provide us with the details below. When you are done click the 'Finish' button. Please note that the information you provide in this form will only be used in accordance with our [privacy policy](#)."
- Form field: "First Name" with the value "NPF".
- Form field: "Last Name" with the value "API".
- Form field: "Mobile Phone" with the value "Mobile Number (e.g. +61 456 556 556)".
- Form field: "Email" with the value "sankaranarayanan@templecitytech.com".
- Form field: "Choose a Password" with a note "Must be longer than 6 characters".
- Text: "Password Strength: (No Password)".
- Text: "By clicking Finish, you agree to the [Terms of Service](#)."
- Form field: "FINISH" button.
- Page footer: "© Saasu 2018 - [Terms of Service](#)".

Send this User ID and Password to the NPF team.
