

Cin7 is an online inventory management system that packed with features, which helps you manage your business effectively while serving you time for the work that actually matters.

The API Integration allows you to connect to the NPFulfilment Logistics Platform -

- Pull orders from Cin7 client site
- Pull tracking numbers from NPFulfilment to Cin7
- Pull the Available Stock on Hand quantity
- Pull the SOH (Stock on Hand) quantity from NPFulfilment

Testing Criteria: Test Orders to be created using the following test item to test the full integration. These are test items we will not physically dispatch them during the testing process.

NPF001 / NPF004 / NPF005

Order Status and tracking: NPFulfilment allow us to get the status of the order at any time. If the order is shipped you can get the tracking number and carrier name as well from NPFulfilment.

Stock Updates: Cin7 can push the stock levels from NPFulfilment.

There are two options

- SOH Quantity – This is the actual physical stock at the warehouse.
- Available SOH Quantity – This is the quantity that is retrieved after deducting the orders from the SOH/ Ready for Process stage/ Back orders if any.
