

OsCommerce Documentation

1) OsCommerce Credentials

- OsCommerce URL
- OsCommerce Admin User name and Password.

2) Generate Credentials in Admin Panel.

Click Administrators Menu under Configuration.

The screenshot shows the osCommerce Admin Panel interface. The top navigation bar includes 'Administration | Online Catalog | Support Site' and 'Logged in as: Admin (Logout)'. The left sidebar contains a 'Configuration' menu with a yellow arrow pointing to the 'Administrators' option. The main content area displays two line graphs: 'NPF' (Total Revenue) and 'Customers' (Total Customers). Below the graphs are tables for 'Orders', 'Customers', 'Last Administrator Logins', 'Latest News', and 'Latest Add-Ons'. A yellow warning box is visible on the right side of the main content area.

Configuration Menu:

Warning Box:

I am able to write to the configuration file: /home/content/58/9181258/html/tctphp/OS/includes/configure.php. This is a potential security risk - please set the right user permissions on this file.

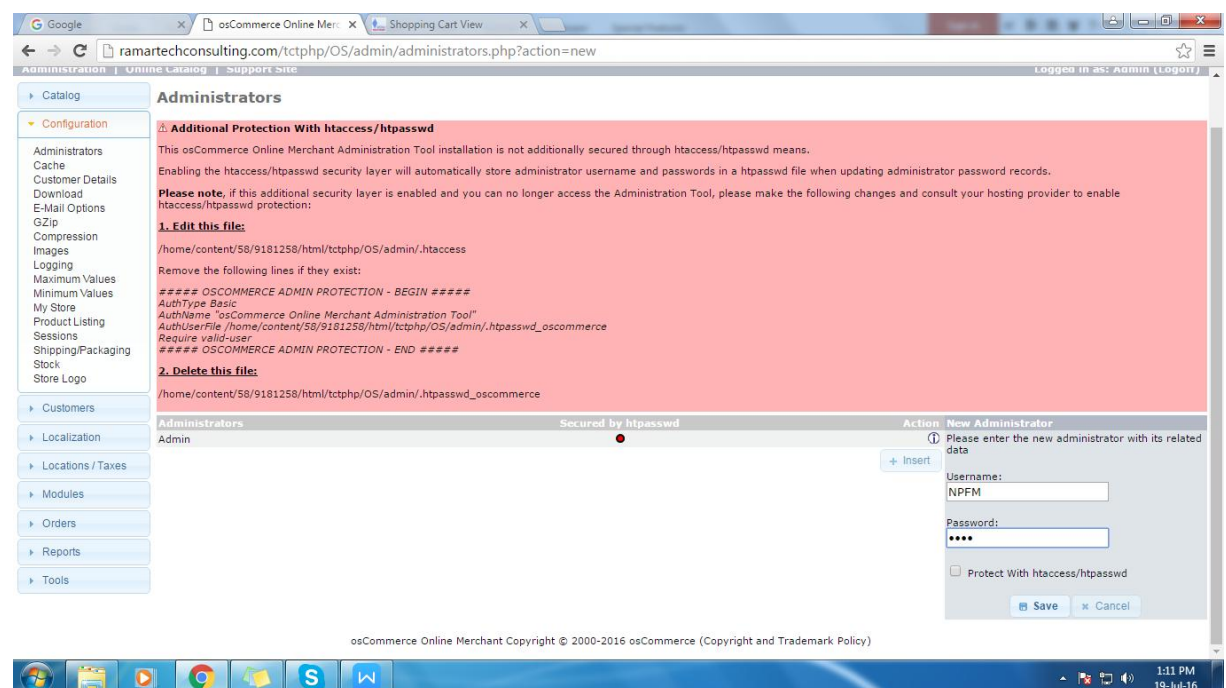

It has been over 30 days since the extended security checks were last performed. Please re-run the extended security checks under Tools -> Security Checks.

Installation directory exists at: /home/content/58/9181258/html/tctphp/OS/install. Please remove this directory for security reasons.

Click Insert Button to Enter new Admin Credentials.

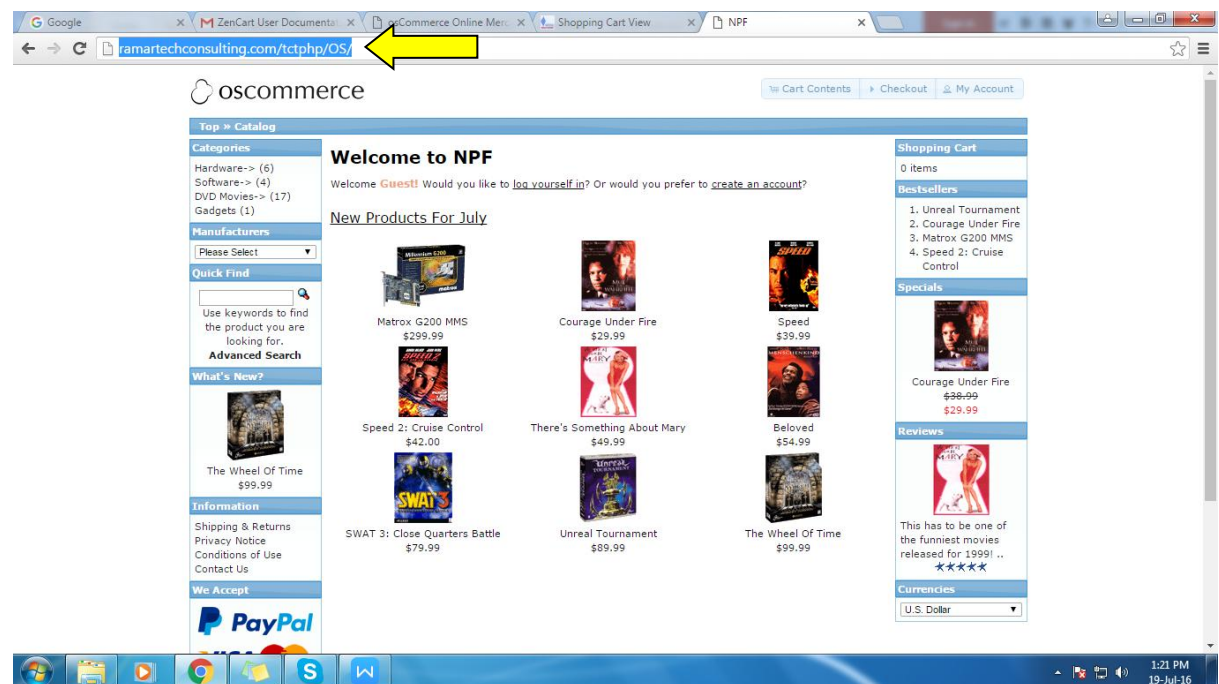

Enter the User name and Password and Click Save Button.

This User name and password is used as the Credentials to Get the Order From the Shopping Cart.

3) OsCommerce URL

4) OsCommerce Order Status

- Pending : Payment Not Yet Received.
- Processing : Payment Received and Ready to Dispatch.
- Delivered : Order Delivered to the Customer.

5) File Updating

Copy the “ordersList.php” file and Save in your root folder.

Ex: ../ordersList.php.
